YouTube trends

list of questions — are they links?

trending velocity — interesting concept

Kaggle, YouTube API

= said remarkably clean data

(I'm not surprised with Kaggle!
And honestly, a Google API.)

trending video views & histograms
maybe more bins

most of videos ~~are~~ < 2 M views

cool pie charts

probably say "outside the US"
not "0 US"

(but I get it)

also for Exhibit 2 \rightarrow 3 categories in
similar, dark blue colors
 \rightarrow try more split w/ colors

Exhibit 3 really cool!

time conversion a big issue!
(for all analytics projects/
data sets)

I felt like your group more than
other groups talked about "we did
this..." & "we analyzed..."

□ time → what time zone

□ any random videos or specific trends
you found?

cool colours for Exhibit 5

□ surprised to see [none] as popular
tag!

Very interesting analysis & cool that
you broke out specific categories,

"trends velocity" - you came up
w/ this phrase?!
fun!
